What is SecureCentric?

SecureCentric is a comprehensive security solution designed specifically for small to medium sized businesses. It's an all-in-one security toolbox that empowers your company's internal IT with the essential technology, tools, and support they need to concentrate on core security responsibilities.

We partner with your in-house IT team to ensure a seamless and secure technology infrastructure, while maintaining efficiency and compliance in the face of cyber threats. With SecureCentric, your company will have a strong line of defense against cyber attacks and the ability to promptly address and remediate any security breaches that may occur.

SecureCentric is for organizations that...

- Need prompt and effective remediation of security breaches
- Require a strong line of defense against cyber threats
- Have experienced a cyber-attack in the past
- Are seeking cost-effective security solutions
- Want to improve their overall cybersecurity posture
- Need to meet specific compliance requirements
- Want to make security a key part of their company culture
- Require assistance with cyber insurance coverage and risk assessment

SecureCentric - The DiamondIT Solution

SecureCentric is more than just a set of tools and resources for security monitoring. We take a proactive approach to security by implementing lockdown environments, tools, and policies to keep your business safe. Additionally, we provide security awareness training to help make security a key part of your company culture. In the event of a cyber-attack, our real-time monitoring and instant response team is available 24/7 to confirm active threats and quickly engage in remediation efforts.

With our instant rollback capability, we can restore your systems to their pre-attack state, minimizing downtime and maximizing protection for your business. Trust **SecureCentric** to help secure your business and make security an integral part of your company culture.
